Scope of Work

- Provide, plant and provide initial watering of 14 new valley oak trees (Quercus lobata). Tree centerlines shall be located between 9’ and 12’ from the edge of pavement. Exact location of Trees must be approved by San Mateo Department of Public Works. Trees shall be 15 gallon (#15) size with trunk caliper of 3/4” minimum. Trees shall have a single trunk with an upright shape.
- Location staking will be provided prior to the start of work.
- Prune and stake 15 re-sprouted trees
- Prune re-sprouted and new trees annually for 5 years.

Work by San Mateo County Public Works:
- Provide regular watering of newly planted, re-sprouted and live oak sprouts for 5 years.
- Provide 1/2” mesh galvanized steel aviary cloth gopher cages at all newly planted trees. Fold cloth around bottom and sides of root ball and over the top of the tree trunk.

Staging and Work Area

All work shall occur off of the ac pavement area of Cañada Road. Park vehicles and equipment and stage materials only in areas designated “Staging Area” on this drawing.
